GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockponds Constructed Prior to 1969"  
"Appropriation of Water in California"

Mr. Leland Haley  
P.O. Box 93  
Wilseyville, CA 95257

Dear Mr. Haley:

## COMPLAINTS CONCERNING DIVERSION OF WATER FROM THE MIDDLE FORK OF THE MOKELUMNE RIVER IN CALAVERAS COUNTY

The Division of Water Rights (Division) has accepted your request (letter dated October 17, 1995) for reconsideration of the directions to you in the Division's October 5, 1995 letter. This reconsideration is based on your contention that ongoing maintenance is reducing conveyance losses in the ditch carrying water to your property from the Middle Fork of the Mokelumne River.

Division staff will remeasure the flow rates at your point of diversion and place of use during the upcoming irrigation season to determine if ditch losses have been reduced. The tentative date for remeasurement will be Wednesday, July 10, 1996. This date should allow for adequate wetting of the ditch prior to measurements.

As of this date, the Division has not received a Statement of Water Diversion and Use form for your continued direct diversion of water. This Statement is required by Water Code Sections 5100-5108. You should also file an application for an appropriative water right if seasonal storage is maintained in your ponds.

Your proposal to install a staff gage at the point of diversion may be a part of the solution to the issues raised in the complaint. The proposal will be considered after the flow measurements are completed this summer.

If you have questions, you may reach me at (916) 657-1359. The staff person assigned to this issue is Ricardo Fuentes. He can be reached at (916) 657-1989.

Sincerely,

ORIGINAL SIGNED BY:

Edward C. Anton, Chief  
Division of Water Rights
